

## Host Multiple Web Sites On 1 Hosting Account

In addition to your primary hosted domain name, you can host unlimited domains names on your **Deluxe** and **Premium** hosting plans.

If the new domain name is in your account, changing the domain takes between 2 and 24 hours, during which time your Web site is accessible through both the old and new domain.

If the new domain name is not in your account, you must manually update your domain's A record so that it points to your Web site's IP address. If the new domain name has subdomains, you must manually create an A record for each subdomain.

**Example:** I have the domain name **www.mywebhostingclub.com** in a subdirectory in the **www.cistx.com** hosting account. When you click on <http://www.mywebhostingclub.com>, you will never know it is hosted on the **www.cistx.com** hosting account.

After pointing your new domain name to the subdirectory, you would upload your website (index.html and other pages) to that subdirectory.

**However, your new website will share the bandwidth with your primary hosting account.** But for 98% of the businesses that have more than 1 website, **this is a great alternative to paying for multiple hosting accounts.** Plus, there is plenty of bandwidth and disk space.

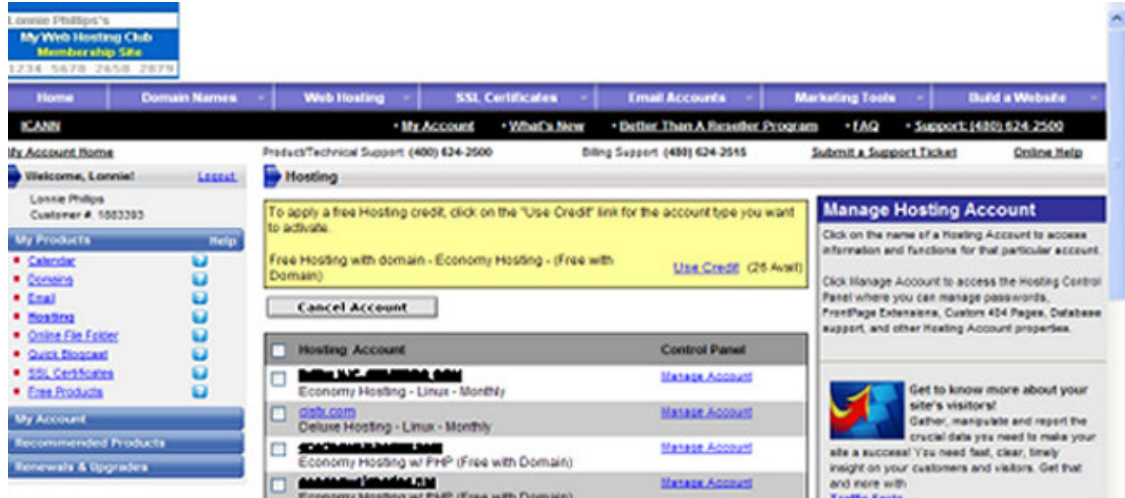

If you see your website using too much bandwidth, you can always upgrade (add bandwidth) or you are making enough money to get a separate hosting account!

Below are the step by step instructions:

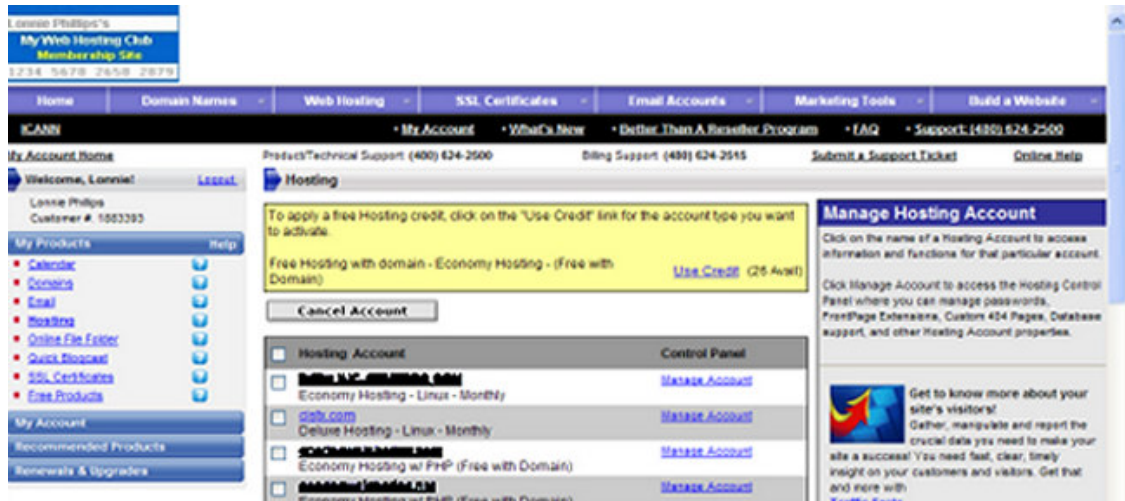

### 1. Log in to **My Account**.

The screenshot displays the user interface of the 'My Web Hosting Club' membership site. At the top left, there is a logo for 'Lonnie Phillips's My Web Hosting Club Membership Site' with the phone number '1.234.5678.2658.2879'. Below the logo is a navigation menu with links for Home, Domain Names, Web Hosting, SSL Certificates, Email Accounts, Marketing Tools, and Build a Website. A secondary navigation bar includes links for My Account, What's New, Better Than A Reseller Program, FAQ, and Support: (480) 624-2500. Below this, there are links for Product/Technical Support (480) 624-2500, Billing Support (480) 624-2515, Submit a Support Ticket, and Online Help. The main content area is divided into three sections: 'Login to My Account' with fields for Customer # or Login Name and Password, and links for 'Forgot Your Password?' and 'Create a New Account'; 'Web Mail' with a 'Please login to your Web Mail account:' prompt, fields for Email Address and Password, a 'Remember me' checkbox, and a 'Login to Web Mail' button; and 'Calendar' with a 'Please login to your Web Mail account:' prompt and a 'Login to Web Mail' button. On the right side, there is a 'Domain Name Search' section with a search box and a 'GO!' button. At the bottom left, there are links for 'My Products', 'My Account', 'Recommended Products', and 'Renewals & Upgrades'.

2. Under the **My Products** section, select **Hosting**.

3. Next to the hosting account you would like to add a new domain name to, click **Manage Account**.

4. Under **Account Summary**, make sure the **Hosting Configuration** is 2.0 (if it is 1.0, click the upgrade link to change it - this change may take up to 24 hours to propagate.)

Click the **Your Domains** button from the 4 large buttons.

The screenshot shows the 'Home' page of the Hosting Control Center. At the top, there are navigation tabs: Home, Settings, Content, Databases, Statistics, and Help. Below these are four large buttons: 'Your Files', 'Your Applications', 'Your Domains', and 'Your Email'. The 'Your Domains' button is highlighted. To the right, there is an advertisement for 'SSL Certificates'. Below the buttons is the 'Account Summary' section, which displays various server details:

- Domain Name: cistx.com
- Server IP Address: [Redacted]
- SSL Status: [Redacted] [Purchase SSL Certificate](#)
- Operating System: Linux
- Hosting Configuration: 2.0
- PHP Version: PHP 4.x
- Primary Domain DNS: [View](#)
- # of MySQL Databases: 2 Setup of 25 Available
- Bandwidth Allotment: 1,500,000 MB
- Disk Space Allotment: 150,000 MB

Below the account summary are expandable sections for Settings, Content, Databases, and Statistics. On the right side, there is a 'Previous' and 'Next' navigation bar.

5. Click on the **Add Domain** button in the right corner above the **Action** heading.

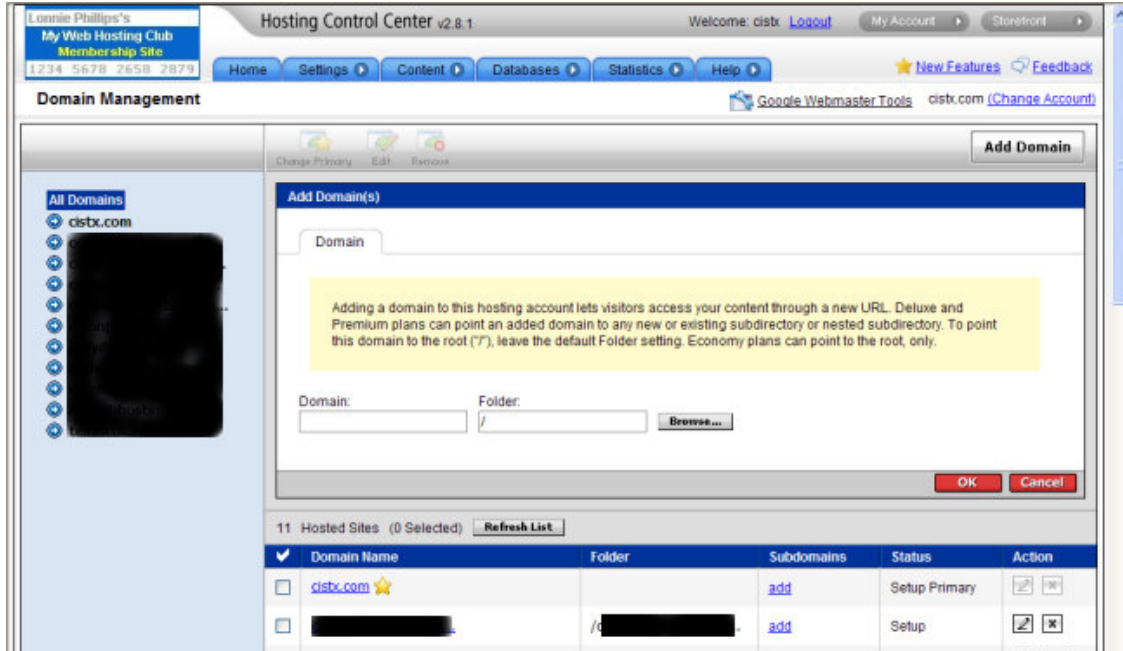

The screenshot shows the 'Domain Management' page. At the top, there are navigation tabs: Home, Settings, Content, Databases, Statistics, and Help. Below these are buttons for 'Change Primary', 'Edit', and 'Remove'. The 'Add Domain' button is highlighted in the top right corner. The main content area shows a table of hosted sites:

Domain Name	Folder	Subdomains	Status	Action
<input checked="" type="checkbox"/> cistx.com		<a href="#">add</a>	Setup Primary	<a href="#">edit</a> <a href="#">remove</a>
<input type="checkbox"/> [Redacted]	/[Redacted]..	<a href="#">add</a>	Setup	<a href="#">edit</a> <a href="#">remove</a>
<input type="checkbox"/> [Redacted]	/c[Redacted]..	<a href="#">add</a>	Setup	<a href="#">edit</a> <a href="#">remove</a>
<input type="checkbox"/> [Redacted]	/[Redacted]	<a href="#">add</a>	Setup	<a href="#">edit</a> <a href="#">remove</a>
<input type="checkbox"/> [Redacted]	/c[Redacted]	<a href="#">add</a>	Setup	<a href="#">edit</a> <a href="#">remove</a>
<input type="checkbox"/> [Redacted]	/[Redacted]	<a href="#">add</a>	Setup	<a href="#">edit</a> <a href="#">remove</a>

The table has 11 hosted sites in total, with 0 selected. There is a 'Refresh List' button above the table. On the left side, there is a sidebar with 'All Domains' and a tree view showing 'cistx.com'.

### Host Multiple Web Sites On 1 Hosting Account

6. The **Domains** box opens.

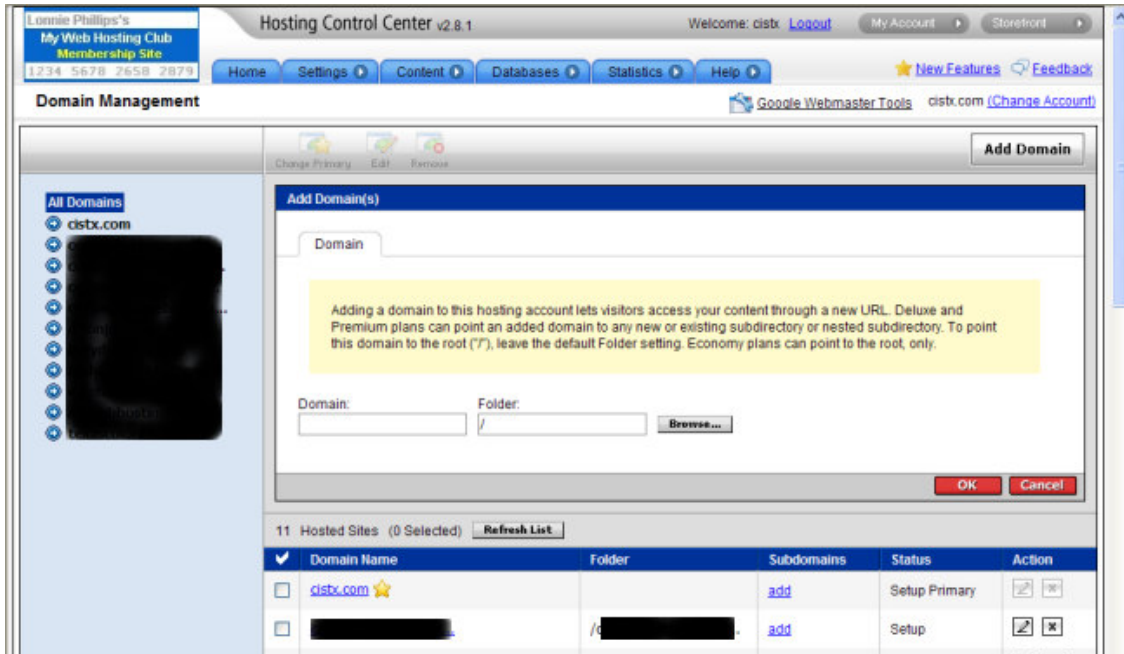

**NOTE:** Inside the yellow box it says:

Adding a domain to this hosting account lets visitors access your content through a new URL. **Deluxe** and **Premium** plans can point an added domain to any new or existing subdirectory or nested subdirectory. To point this domain to the root ("/"), leave the default Folder setting.

7. In the **Domain** box, put the name of the domain you want to add (if you put the first letter of the domain name you want, the list of domains you own will show.) Select the domain name you want to add.

In the **Folder** box, you can either put a new subdirectory name in the **folder box** or you can use the browse button to pick a subdirectory name you already have.

8. Then click **OK**.

9. You can then upload your website to that subdirectory.

It is very easy to understand but **as with everything, (depending on your level of experience), YOU MAY HAVE TROUBLE doing it for the first time**, if you have trouble please call Customer Service.

1. We are open 24 hours a day 7 days a week.
2. We are located in the United States.
3. YES, we speak English!

To Your Success,

*Lonnie Phillips*
